Sample Warning Sent by Sims. Here is a copy of a warning cabled by Admiral Sims May 1, 19131 Highly secret. Admiralty informs me that information from reliable

Deutschland type left Germany about To THE SUN AND NEW YORK HERALD: 19th April to attack either American troop transports or ships carrying material from the States. So far as known the Germans formed conclu-1. Troop transports sail from New

York via Nantucket Shoals and Sable Island direct to Europe. 2. Material transports go from Newport News to a point south of

ermuda and then to Azores and thence to destination (conclusions which Sims said were incorrect). It is thought that the submarine is taking a northern route across Atlantic; average speed, five knots.

None of new class of cruising sub marines ready for service. Admiralty experience with the Deutschland class establishes following conclusions:

They generally operate a long distance from shore and seidom in less than 100 fathoms. Their single hulls are very vulnerable to depth charge attack. They rarely attack subnerged. There is but one known instance of attack against convoy and but two of torpedo attack against single vessels, one being unsuccessful. They attack by gunfire almost exclusively. The most effective type to se them is the submarine. shift their operating area when discovered. Admiralty requests Admiral Grant (commander of British patrel

this cablegram. Admiral Sims also furnished records of other warnings that proved correct.
